

Snake Plant Watering Log & Schedule

- Checkpoints before watering: top 4–5 cm dry, moisture meter < 3, pot feels light, leaves firm.
- Best soil mix: potting soil + perlite + sand (well-draining). Pot must have drainage hole.
- Seasonal guide: Winter every 4–6 wks, Summer every 2–3 wks (adjust for light & temp).

Date	Finger test	Depth (cm)	Meter (0-10)	Last watering	Days	Watered (Y/N)	Amount (mL)	Notes

* Suggested frequencies are indicative. Always check soil and leaf condition before watering.
